Access Control .....	46
Change an existing form with hook form alter .....	49
Create a block programatically .....	54
Configurable block .....	57

Display message when a user logs in .....	59
Summary .....	62
Lesson Four - Todotoday Feature Module .....	63
Features .....	63
Add content type .....	64
Add data .....	74
Add to feature .....	77
Summary .....	81
Lesson Five - Extend Todotoday Feature Module .....	82
Custom code .....	82
Editing .module file .....	83
Display data on custom path .....	84
Add argument to path .....	91
Security and usability issues .....	97
Display data with Views .....	100
Todo Today Block .....	103
Recreate Feature .....	105
Summary .....	106
Lesson Six - Welcome module .....	107
Create module files .....	107
Display a message .....	108
Admin interface .....	109
Drupal Variables .....	114
Display the configured message .....	117
Personalise the message .....	118
Summary .....	126
Lesson Seven - Extend Welcome Module .....	127
Getting the code organised .....	127
Setup a new table .....	131
Updating an enabled module .....	134
Adjusting the admin form .....	139

Saving to the Database .....	144
Pre-populating the admin form .....	150
Dealing with new vs existing records .....	158
Display message to user .....	160
Testing the welcome message .....	165
Summary .....	169

Registering a theme function .....	170
Theme Function .....	172
Form help text .....	176
Invoking your own hook .....	178
Summary .....	184
Lesson Nine - Latest News Feature .....	186
Why theme a module? .....	186
Content type .....	187
Block .....	190
Create Latest News Feature .....	193
Add Latest News template .....	195
Add fields to template .....	198
Add blog specific CSS .....	200
Summary .....	201
Lesson Ten - Extend Latest News .....	202
Generate dummy content .....	202
List of latest news in Drush .....	205
Your first Drush command .....	206
Get latest news .....	207
Drush Log .....	209
Check for result .....	210
Limiting the results .....	211
Adding an alias .....	216
Summary .....	216

Lesson Eleven - Security Best Practice .....	218
SQL Injection.....	219
Cross-site Request Forgeries (CSRF).....	222
Cross-site scripting (XSS) .....	225
Text formats.....	228
Filtering functions.....	230
Access control.....	234
Admin account.....	236
Security configuration outside Drupal.....	237
Incorrect use of Form API.....	238
Hacking core.....	240
Summary.....	240
Lesson Twelve - Security Audit.....	242
Not sanitising user data.....	243
SQL Injection.....	245
Unsanitised form data.....	247
Cross-site Request Forgery.....	250
Node access.....	253
More information.....	256
